

Business Phone System

Business Phone System for Modern Offices

A fully-managed phone system in the cloud. Focus on what's important. Move your business forward.

CONVENIENT

EASY TO USE

SMS CAPABLE

A cloud-based phone system is ideal for a modern office. It offers reliability, flexibility, and scalability. With advanced features like voicemail-to-email and call forwarding, businesses can streamline communications and improve customer service.

A hosted cloud-based phone system is rapidly gaining traction across modern offices. It offers flexibility and reliability that traditional phone systems can't match. This is essential for businesses to provide employees with the mobility they require to work effectively. With an iOS and Android-supported app for mobile use and a browser-based web phone for desktop use, employees can connect whenever and wherever they want.

If you're looking for a phone system that can keep up with the demands of today's workplace, a hosted cloud-based phone system is worth considering. It's a wise investment that could make all the difference in your business operations.

Business Phone System

The way our workplaces look and behave has been undergoing a great deal of flux and experimentation in recent years, urged on by a wide range of driving forces. From an organizational perspective, there has been a need to make your property portfolio more cost effective, while also providing an engaging environment that both attracts the best talent and helps them to collaborate and innovate.

Flexible Communication

Flexibility, reliability, and mobility are some key defining factors propelling the modern office, all of which are brought to the forefront when using a hosted phone system. With an iOS and Android supported app for mobile use, and a browser-based web phone for desktop use: your workforce can connect whenever they want and however they want. This enables employers to become more dynamic and improve productivity by hiring from a rich talent pool of remote workers whether it be locally or from around the world.

Key Features:

Chat & SMS – Allows business texting and chat to happen from either your desktop or mobile phone without mixing your business and personal messages.

Find Me/Follow Me - Callers dial one phone number and can reach you wherever you are, on any of your devices. You can set all your phones to ring simultaneously or have them ring in sequence.

Internet Fax - Reliable Fax-to-Email and Email-to-Fax service to meet all your business needs. Fax from anywhere with an internet connection at any time. Direct incoming faxes straight to your email inbox.

Transcription - All your voicemail messages are transformed into readable text so you can quickly scan your messages as they come in. Conveniently read them on your computer or mobile device.

Web Phone - Increase the reach of your business phone system and open the door to a more geographically diverse workforce with a browser based phone solution using any Mac/PC, a web browser, and a microphone.

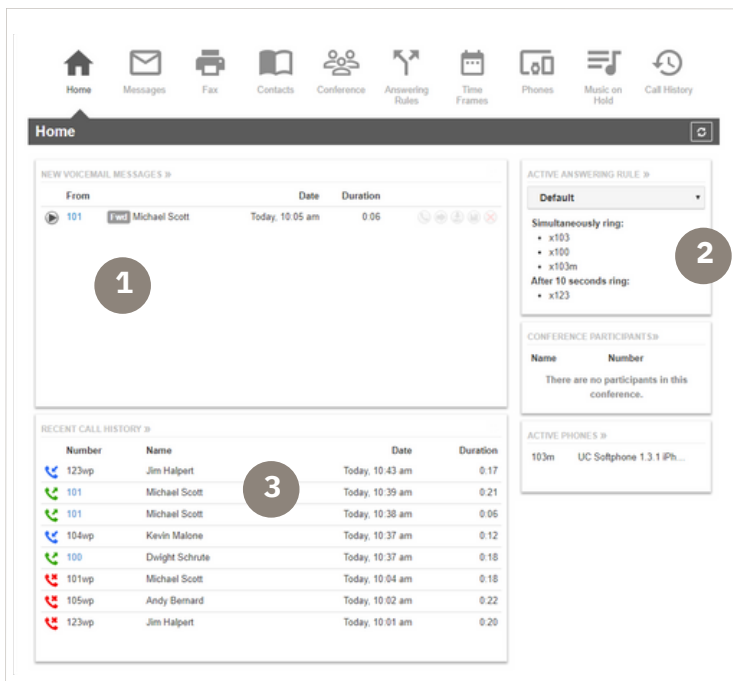

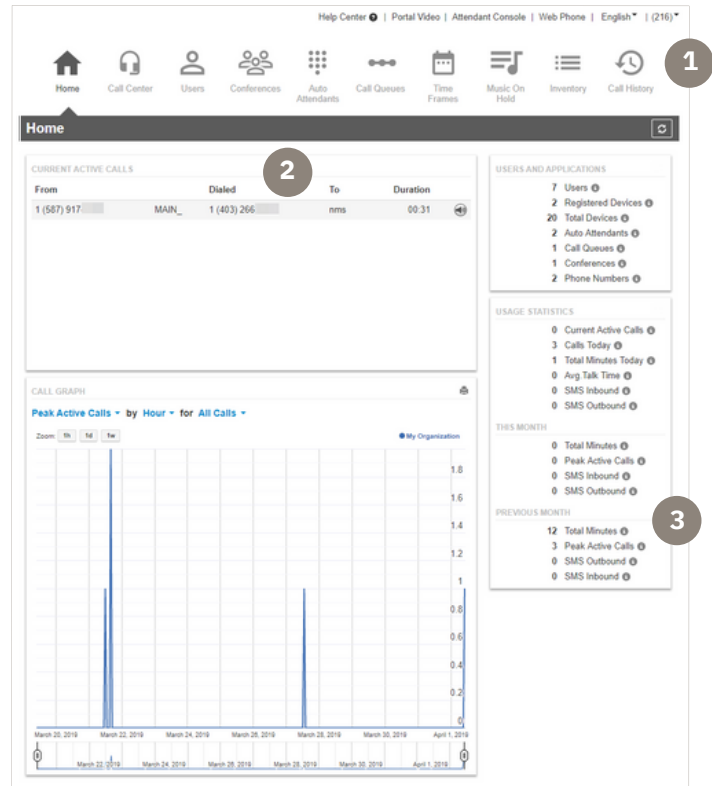

Convenience is in the Cloud

As a business owner, it can be challenging to streamline your operations while keeping costs low. Our advanced phone features offer crystal-clear call quality, flexibility, and system scalability, all delivered over our reliable geo-redundant platform. By choosing our cloud-hosted communications system, you can reduce office phone system costs and increase productivity simultaneously with our platform's convenience and reliability; it is the best solution for any business looking to improve its operations.

Business Phone System

Exceptional Features

Office Manager Web Portal

A dedicated portal that lets you control all functions and features of your phone system.

User Web Portal

An easy to use web portal for each user to review call logs, listen to and manage voicemail and change personal settings.

Call Conference (3 Way Calling)

Add another outgoing call to an already connected call.

Call Forward

Selectable options on forward always, forward on busy, when unanswered or when offline. You can also redirect calls to your mobile phone/external phone number or a user inside your office.

Call Hold

Easily puts a call on hold while you answer another call.

Call Logs

Provides downloadable detailed call records by extension or by company.

Call Screening

Callers are required to record their name, and you get an audible option to accept/decline.

Call Transfer

Transfer calls to another user or outside phone number.

Call Blocking

Block unwanted and/or anonymous callers.

Caller ID and Name Display

Know who is calling before you answer with name and number display.

Caller ID Block

Block your caller ID from being displayed on outbound calls.

Click to Dial

Users can click to dial numbers and return calls in call history from their User Web Portal.

Do Not Disturb

Callers go directly to voicemail when you don't want to be interrupted.

Emergency Assistance (911)

Set an address for individual extensions (users) or for your entire company so that responders know where to send help in the event of an emergency.

Find Me – Follow Me

Calls can be forwarded to multiple numbers that will ring all at the same time or in a sequence you define.

Mobile Apps

Tablet, smartphone and computer apps are available to allow dialing to and from these mobile devices from a WiFi or cellular network.

On Demand Call Recording

Records calls on your extension with simple keystrokes, record what you want, when you want.

Company Call Recording

Automatically record some or all company phone calls and save them securely.

Multiple Devices

You can register multiple devices for each extension. For example you could have your office phone, a softphone on your mobile device and another phone at your home and all could ring at the same time.

Ten-digit Dialing

No need to dial 9 or even 1 to make a long distance call.

Automated Attendant/ Virtual Receptionist

Streamline efficiency with an Automated Attendant to answer and direct all your inbound calls. You can optionally configure to have live answer before the Automated Attendant kicks in. Incoming callers select options from a menu to reach the appropriate department or individual.

- Different greetings for day or night
- Holiday schedule and greetings
- Dial by name directory
- Transfer to external numbers automatically

Music and Messages on Hold

Upload your customized recordings. We can also record your message for you.

Simultaneous Ring

Same as Find Me - Follow Me, allows you to program many numbers where you can be called in a cascading or simultaneous order.

Time Frames

Easy drag and drop scheduler to set your office hours and call routing.

Voicemail

Every user gets their own voicemail to securely check messages from the phone, or a website from anywhere in the world.

Voicemail to Email

Receive voicemail as an audio file attached to email. Can be played back on your smart hone. Also see optional Voicemail Transcription.

Hunt Groups

Calls can be forwarded to multiple users or telephone numbers that will ring all at the same time or in a sequence you define. For example, the sales or service team can be in a hunt group.

Web Phone

Use an extension on the go using chrome with any computer and microphone. Compact and expanded views give users the choice to see active chats, answering rules, voicemail messages, and more.

Mobile Softphone

Compatible with both Android and iOS the Mobile Softphone allows any user to use their cell phone like a desk phone. Dial contacts in your local phone book or company directory, record and change greetings, send and receive chat messages, and view your voicemail and transcription right from the app.

Add-on Features

Voicemail Transcription

Have your voicemail messages emailed to you as written transcripts, with audio files attached.

Greeting Changes

Changes to your greetings are available. Fees apply to each order which could include single or multiple recording changes done at the same time. You can upload and record your own greetings at no charge anytime.

Conference Calling

Full web control and recording for inbound calling. Also add outbound called participants from the portal.

Toll Free Number

Add a new toll free number or let us move your existing toll free number. Toll Free numbers allow anyone in Canada and the US to reach you without the caller incurring any long distance charges.

Local Numbers

Keep your existing number(s) or pick from over 1,600 Canadian cities or towns. Portray a local presence in any additional market by publishing a local phone number in any area code. International and US cities are also available.

- Local numbers for remote employees
- Great for geo-targeted marketing campaigns
- Same functionality as Main Company Phone Number

Internet Fax

Easily send faxes via the web or email. Receive faxes via the Web or in your email as an easy-to-file-or- forward PDF document.

Portal Fax

Use your phone portal account to send and receive personal faxes in PDF format. Faxes will be forwarded to your email for attention.
